The University of Georgia has presented me with the amazing opportunity of Forage. Forage is a platform that provides students with virtual work experience programs that give students like me the opportunity to learn career skills from Fortune 500 companies. This program is self-paced and exposes you to many different work tasks and allows you to develop practical skills. I recently received my first certificate of completion with **Mastercard**'s Cybersecurity program through Forage, and I plan on doing many more! This program exposed me to many different skills such Cybersecurity, Technical Security awareness, Problem Solving, Data Analysis, Design Thinking, Data Presentation and more!

mastercard.

Last week, I completed the JPMorgan Chase & Co. Software Engineering Virtual Experience. It was a great opportunity to get some insight into what interns at JPMC may work on in relation to front end data visualization and data analysis.

This was my first virtual experience and I am excited to participate in more in the future. This one, in particular, was provided by Forage and is completely free. Here is the link for any other students interested: https://lnkd.in/dN6APUA

Special thanks to Felix Ekwueme for letting me know about this opportunity!
